

BISON SLIMHOLE ROTARY DRILL HOSE

Bison is used for delivering a large quantity of high pressure water-based or oil-based mud with min. aniline point at 150° F pumped out of rotary drilling equipment. It is resistant to corrosion from hydrogen sulfide and delivers water, oil, mud and other high-pressure media in borehole operation in oil field.

Meets API Spec 7K Standards.

- ▶ **CORE:** *Oil resistant synthetic rubber*
- ▶ **REINFORCEMENT:** *Four steel wire spiral reinforcement*
- ▶ **COVER:** *Oil and weather resistant anti-abrasive synthetic rubber wrapped cover*
- ▶ **TEMPERATURE:** *-40° F to +212° F*

Part Number	 I.D. (inch)	 O.D. (inch)	 Working Pressure (PSI)	 Burst Pressure (PSI)	 Bend Radius (inch)	 Lbs./Ft.
AH-48-SHR-3000	3"	3.84"	3,000 PSI	12,000 PSI	38.6"	5.97 Lbs/Ft
