

# Layflat Hose

The PVC layflat hose is made of high strength polyester filament and high quality PVC. Hose offers great resistance and is lightweight, making layflat hose easy to use and transport. Layflat hose can be used as main hose of irrigation system and is designed for water discharge for long lasting service.

**PVC/Nitrile** - Popular due to being heavy duty and is the best choice for rough conditions. PVC Nitrile Layflat hoses are widely used in water discharge, drainage, irrigation installations, pumping of sludge and liquid fertilizers, chemical industry, mining, etc.
